SILENTA®

A-COM 2BT

COMMUNICATION HEARING PROTECTOR

HEAR BETTER / SEE FURTHER / DECIDE FASTER

A-COM 2BT

**WIRELESS BLUETOOTH®
CONNECTION -
CAN BE PAIRED WITH
TWO DEVICES**

Wireless Bluetooth Connection - can be paired with two devices

This hearing protector includes two separate Bluetooth units in left and right earcup:

The Bluetooth unit in left earcup is for Motorola two-way radio. It supports PTT-functionality over Bluetooth with Motorola e-series radios with HKVN4465 licence activated.

The Bluetooth unit in right earcup is for mobile phone. If your phone supports the A2DP Bluetooth profile and has a music player feature, you can also use the phone to play music with the hearing protector.

The most important features are the safety features

The voice/sound will always be heard through Motorola radio even though the other device is active. This is an important feature of safety.

PTT- talk on shell enables to communicate by pressing the rotary switch on the left ear cup. It is mechanically reliable and easy to use even when wearing work gloves.

If you are having a mobile phone conversation (or the other device is active) and you push the Motorola PTT rotary switch, your voice will be heard in both devices. This is also an important feature of safety.

SILENTA®

A-COM 2BT

COMMUNICATION HEARING
PROTECTOR

BLUETOOTH®

- Qualified Bluetooth device, for wireless connection to a mobile phone or communication radio
- Wireless transmission range approximately 10 m
